

SIDDHARTH PUHAN

Gwalior, Madhya Pradesh, India | puhansiddharth@gmail.com | +91 9342380742 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Amity University Madhya Pradesh

B.Tech, Computer Science Engineering — CGPA: 8.49/10 | Minor: Cyber Security

Gwalior, India

Expected June 2028

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript, SQL, HTML, CSS
- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Zustand
- **Backend:** Node.js, Express.js, RESTful APIs, WebSockets (Socket.IO)
- **Databases:** PostgreSQL, Supabase, MySQL
- **AI/ML:** Groq API, Gemini API, LLM Integration, Prompt Engineering
- **Developer Tools:** Git, GitHub, Postman, Vercel, Render

PROJECTS

ThinkRoom AI — AI-Powered Collaborative Workspace

May 2026 – Jul 2026

Next.js, TypeScript, Node.js, Express.js, Socket.IO, PostgreSQL, Supabase Auth, Groq API | [GitHub](#) | [Live Demo](#)

- Architected and engineered a real-time collaborative workspace end-to-end, from system design through production deployment.
- Migrated the frontend from React to Next.js with TypeScript, restructuring routing and components for scalability and maintainability.
- Designed a RESTful API and real-time communication layer with Node.js, Express.js, and Socket.IO, backed by PostgreSQL.
- Integrated the Groq API to power an in-chat AI assistant (@AI) for task extraction and meeting summarization.
- Implemented authentication with Supabase Auth and deployed the full stack to production across ~60 commits.

PhishGuard

Dec 2025 – Jan 2026

React, Vite, Tailwind CSS, Node.js, Express.js, Supabase, Groq API | [GitHub](#) | [Live Demo](#)

- Engineered an AI-powered cybersecurity platform that analyzes URLs and emails in real time to detect phishing and calculate threat risk.
- Replaced an initial ML detection model with Groq API-driven contextual analysis, strengthening threat reasoning and simplifying deployment.
- Designed an authenticated dashboard with historical threat tracking using Supabase, deployed via Vercel and Render.

Kropify

Aug 2025 – Sep 2025

React, Node.js, Express.js, Gemini API | Team of 4 (Frontend Developer) | [GitHub](#) | [Live Demo](#)

- Owned complete frontend development for an AI-assisted crop yield prediction platform, delivering a responsive, production-quality UI.
- Developed interfaces for soil analysis, yield prediction, and fertilizer recommendations, integrated with the Gemini API.
- Collaborated within a 4-person engineering team under hackathon timelines to integrate frontend and backend into one cohesive product.

ACHIEVEMENTS

- Track Winner — Best Use of Auth0, AceHack 4.0 (MLH-sponsored hackathon), for implementing secure user authentication.
- Selected for the Smart India Hackathon (SIH) University Internal Round with Kropify, advancing past the initial round.

LEADERSHIP

Technical Coordinator — Amity Coding Club

Present

- Lead technical direction for the Amity Coding Club, setting priorities and initiatives for a ~20-member team.
- Mentor junior developers on engineering practices, tooling, and industry trends through hands-on guidance.
- Design and contribute technical projects for the club while organizing events for the student community.

RESEARCH & PUBLICATIONS

Wetlands Detection using Machine Learning

2025

- Authored a research review paper (Grade: A+) analyzing remote sensing and ML classification models for wetland identification and ecosystem monitoring.
